

Stikins Name Labels

These new name labels have been recommended to us by other PTA organisations.

The labels require no Sewing or Ironing, but you do need to ensure they are stuck on name labels in clothes and not directly onto the garment.

Stikins ® are made with a specially developed adhesive (only available on Stikins ® name labels) that is designed to create a bond that will hold your name labels firmly and securely in place under all sorts of conditions. Created with the stresses and strains of everyday life in mind, the strong and resilient adhesive can withstand both the rough and tumble of day to day life and repeat trips through the washing machine, tumble drier, dishwasher, microwave, or sink.

Members of the FOWS committee have been testing the labels before advertising them to you. We have found that as long as you follow the instructions then they do withstand washing machines and dishwashers. The only problem was when a label was stuck directly to the garment rather than the label, so please follow the instructions and on clothes attach to a garment label and not directly to the clothes.

Leaflets are being distributed via bookbags. Please order direct with the company, orders cannot be done via the school. But if you include our school reference number (25591) when you order we can earn 15% commission back on the order.

Please let FOWS have any feedback (good or bad) on the labels.
